Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Imamura et al (Imamura) USPAT 6,563,993 provided by Applicant.

As to claim 1, Imamura discloses a light pipe [col. 6, lines 33-63] with directional side-light extraction, comprising: a) a light pipe; b) light-extraction means, 1, applied to the light pipe over only a part of the cross-sectional perimeter of the light pipe and over an active section in which directional side lighting is desired [c)].

Applicant's Figure 2c:

FIG. 2c

Imamura Figure 2:

Fig. 2

2. The light pipe of claim 1, wherein the active section comprises a fraction of the length of the light pipe [col. 5, lines 1-3, 43-45, and 50-58].

3. The light pipe of claim 1, wherein the light pipe has a substantially circular cross section [per Figure 2 and col. 6, lines 4-5].

4. The light pipe of claim 1, wherein the lumen output as between inlet and outlet portions of the active section is within plus or minus 10 percent of the average value of each other [inherent for short lengths per table at col. 11, lines 47-66].

5. The light pipe of claim 1, wherein the light-extraction means is a single strip of uniform width over the active section of the light pipe [col. 6, lines 33-63].

20. The light pipe of claim 1, wherein a substantial section of the light pipe is free of light-extraction means so as to act as a conveyance of light between a light source and a section of the light pipe with light-extraction means [disclosed as desired, Figure 4, and col. 5, lines 1-3, 43-45, and 50-58].
